1

Executive Overview

Platform vision & core objectives

Vision Statement

IGen is an umbrella LMS platform that brings India's most competitive examination preparation into a single, gamified, mentor-driven ecosystem. The first vertical — UPSC — is designed to support aspirants across their entire one-year journey with discipline, accountability, and community at its core. The platform is architecturally extensible to NEET, CA, CMA, PSC, and SSC verticals from day one.

Core Objectives

- Keep aspirants motivated across a 12-month grind
- Provide structured, locked learning paths (Year → Month → Week → Day)
- Enable expert mentor matching & scheduling
- Gamify progress with leaderboards & badges
- Automate daily nudges via WhatsApp (N8N)
- Provide real-time review via oral, objective & writing sessions
- Build a mentor marketplace with super-admin approval
- Track discipline metrics: exercise, newspaper, quiz attendance
- Integrate live video reviews with screen-within-screen practicals
- Offer subject-specific courses in addition to full-year tracks
- Scale horizontally to new exam verticals with zero rearchitecting
- Deliver actionable admin analytics per student & mentor

■ Unique differentiator: IGen is the only platform combining daily habit tracking, weekly mentor-gated progression locks, live oral + written review in a single session, and WhatsApp-based AI nudges — all within one integrated ecosystem.

Primary Stakeholders

Stakeholder	Role	Key Interactions
UPSC Aspirant (Student)	Primary end-user	Courses, daily habits, reviews, leaderboard
Mentor / Trainer	Subject expert	Classes, weekly reviews, feedback, ratings
Reviewer / Advisor	Assessment expert	Weekly oral + written + objective review sessions
Super Admin	Platform owner	Mentor approval, course creation, monitoring
Domain Admin	Vertical manager	UPSC/NEET/CA sub-domain management

2

Landing Page & Multi-Domain Gateway

Umbrella portal & domain selection

The landing page serves as the master entry point for all exam verticals. Users arrive here and self-select their preparation domain before entering the relevant sub-platform.

Domain Selection Cards

Currently active: UPSC. Future domains displayed as 'Coming Soon'.

Domain	Status	Target Audience
UPSC (Civil Services)	■ Live	IAS/IPS/IFS aspirants
NEET	■ Phase 2	Medical entrance aspirants
CA (Chartered Accountancy)	■ Phase 2	CA Foundation / Inter / Final
CMA	■ Phase 2	Cost & Management Accountants
PSC (State)	■ Phase 3	State civil services aspirants
SSC (CGL/CHSL/MTS)	■ Phase 3	Staff selection commission exams

User Journey from Landing Page

- User visits eduverse.in → sees domain cards (UPSC highlighted, others coming soon)
- Clicks UPSC → enters UPSC sub-platform with its own branding
- Options presented: Register as Student | Apply as Mentor | Login
- Student registration → email/phone OTP → profile creation → course selection
- Mentor application → detailed form → pending super-admin approval

Landing Page Key Sections

- Hero section with exam countdown timer
 - Domain selection cards (6 verticals)
 - How it works — 3-step visual flow
 - Social proof — cleared aspirants testimonials
 - Mentor showcase carousel
 - Stats bar: aspirants, mentors, success rate
- Feature highlights (gamification, live review)
 - WhatsApp bot preview / demo
 - Leaderboard preview (top 3 blurred)
 - Pricing / Course tiers
 - FAQ accordion
 - Footer with legal, social links

3

Mentor Portal

Application, approval, profile & dashboard

Mentor Onboarding Flow

- **Step 1 — Application:** Applicant clicks 'Apply as Mentor' on the landing page. Fills a multi-step form: personal details, educational qualifications, UPSC attempt history (if any), subjects of expertise (GS1–GS4, CSAT, Essay, Optionals), preferred teaching mode (live class / review / both), availability slots.
- **Step 2 — Document Upload:** Uploads degree certificates, ID proof, and optionally a 3-minute introductory video.
- **Step 3 — Super Admin Review:** Admin receives notification, reviews the application, can approve/reject/request more info. Approval triggers profile creation automatically.
- **Step 4 — Profile Creation:** Approved mentor's profile is published on the platform with expertise tags, rating (starts empty), availability calendar, and review/class capacity settings.
- **Step 5 — Dashboard Access:** Mentor logs in and sees their personalised dashboard.

Mentor Dashboard Features

Feature	Description	Data Shown
Scheduled Classes	Upcoming student-booked sessions	Date, student name, topic, join link
Weekly Reviews Queue	Students awaiting weekly review	Student, week #, performance preview
Feedback & Ratings	Aggregate student reviews	Star rating, written comments, trend
Student Progress View	Overview of mentees	Completion %, discipline score, rank
Earnings Dashboard	Platform payouts	Per-session earnings, monthly total
Availability Manager	Set open/blocked slots	Calendar grid, recurring blocks
Leaderboard Standing	Mentor ranking (top advisor)	Points from reviews, participation

Mentor Roles & Permissions

- Conduct scheduled live classes
 - Conduct weekly review sessions (oral + objective + mains writing)
 - Add prelims MCQ question banks per topic
 - Post mains answer writing prompts
 - Give written feedback post-review
 - Rate student discipline & engagement
- View assigned students' daily habit logs
 - Accept/decline student booking requests
 - Set subject specialisation tags
 - View own rating & student feedback
 - Cannot access other mentors' students
 - Cannot approve/reject other mentors

Student Portal — Full Year Course

Year → Month → Week → Day progression

The Full Year UPSC Course is the flagship product. It maps the entire 12-month preparation cycle into a hierarchical, locked curriculum. Students cannot skip ahead — each week unlocks only after the previous week’s review threshold is met.

Course Hierarchy

Level	Unit	Duration	Unlock Condition
L1 — Year	Full Course	12 Months	Enrolled & payment confirmed
L2 — Month	Monthly Module (e.g. Month 3: Polity)	~4 Weeks	Previous month completed
L3 — Week	Weekly Block (e.g. Week 2: Federalism)	7 Days	Previous week score $\geq 7.5/10$
L4 — Day	Daily Task List	1 Day	Previous day completed (soft lock)

Daily Task Tracker (Discipline Engine)

Each day the student has a structured checklist. Completion of these habits contributes to the week performance score (40% of total weekly score).

Daily Habit	Points	How Tracked
Topic Completion (video/notes)	10 pts	Module completion flag
Daily Quiz Attendance	10 pts	Quiz submitted timestamp
Daily Newspaper Reading (mark headlines)	10 pts	Checkbox + optional notes
Daily Exercise / Physical Activity	10 pts	Self-declaration + duration
Revision Notes Submission (optional)	5 bonus	Text/PDF upload

Weekly Scoring Matrix

A student must score ≥ 7.5 out of 10 to unlock the next week. The 10-point total is computed as: Discipline Score (4 pts) + Reviewer Score (6 pts). Students pick their reviewer/mentor at week-end from a curated list of available advisors.

Component	Max Points	Description
Discipline Score	4.0 pts	Daily habits avg over 7 days (topic, quiz, news, exercise)
Conceptual Clarity (oral)	2.0 pts	30-min oral interview by reviewer on week’s topics
Prelims Objective Score	2.0 pts	15-min MCQ session (mentor-set questions, live screen)
Mains Answer Writing	2.0 pts	15-min live answer writing, reviewed in real-time
TOTAL	10.0 pts	Threshold: 7.5 to unlock next week

5

Weekly Review & Assessment System

60-minute integrated review session

The weekly review is a structured 60-minute live session conducted by an assigned reviewer (who may be a different person from the student's regular mentor). The session has three phases and takes place fully within the platform.

Phase 1 — Oral Interview (0–30 min)

The reviewer conducts a conversational assessment of the student's conceptual understanding of the week's topics. This is a video call within the platform. The reviewer can see the student's topic completion list and prepared notes. Reviewer scores this phase out of 2 points and types textual feedback post-session.

Phase 2 — Prelims Objective Session (30–45 min)

- Questions pre-loaded by the mentor for the week
- Student sees a 'screen-within-screen' MCQ interface
- 15-minute countdown timer enforced
- Auto-submit on timer expiry
- Live screen visible to reviewer in real-time
- Reviewer can annotate / highlight after submission
- Reviewer shares strategy tips for wrong answers
- Score auto-calculated, fed into weekly score

Phase 3 — Mains Answer Writing (45–60 min)

- Reviewer shares a mains-style question on screen
- Student types answer in a live writing pad
- Reviewer watches live typing in real-time
- 15-minute timer; student sees word count
- Post-submission: reviewer gives inline comments
- Feedback covers structure, content, language, relevance
- Reviewer scores out of 2 pts
- Written advice stored on student profile

Mentor Selection at Week-End

At the end of each week, before the review is scheduled, the student browses a list of available reviewers/mentors (filtered by subject, rating, and availability). They send a booking request. The mentor accepts or declines. Once confirmed, the platform generates a calendar event and a meeting link within the platform.

■ Lock Mechanism: If a student scores below 7.5/10, the next week remains locked. They may request one re-review (within 48 hours) with a different reviewer. Second failure allows admin override with a note. This ensures accountability without permanently blocking genuine effort.

Live Classroom & Scheduling

Mentor booking, video sessions & practicals

Beyond the weekly review, students can book ad-hoc sessions with any approved mentor or topic expert for personalised clarification, deep-dives, or mock discussions.

Session Types

Session Type	Duration	Booking Method	Participants
1-on-1 Clarification Class	30 or 60 min	Student-initiated booking	1 student + 1 mentor
Group Discussion	60 min	Mentor-initiated, up to 10 students	Up to 10 students + mentor
Weekly Review Session	60 min	System-prompted at week-end	1 student + 1 reviewer
Mock Interview	45 min	Student-initiated	1 student + 1 reviewer
Mains Answer Writing Workshop	90 min	Mentor-initiated group	Up to 15 students

Booking Flow

- Student selects a topic/subject and clicks 'Find Expert'
- Platform shows available mentors filtered by subject tags, rating, and open slots
- Student views mentor profile (bio, expertise, past student ratings, sample feedback)
- Student picks a time slot from the mentor's live availability calendar
- Booking request sent → mentor receives push + WhatsApp notification
- Mentor accepts → calendar event auto-created for both parties
- 15-minute reminder sent via WhatsApp to both
- Session launches inside the platform (no external Zoom/Meet required)

In-Platform Video Infrastructure

- WebRTC-based peer-to-peer video (low latency)
 - Fallback to TURN/STUN for firewalled networks
 - Screen-within-screen overlay for objective sessions
 - Live typing window (Mains phase) synced to reviewer
- Session recording (with consent) stored for 30 days
 - End-of-session rating prompt (1–5 stars + comment)
 - Real-time chat sidebar during session
 - File/image sharing within session

7

Subject Course Module

Topic-specific structured learning

In addition to the full-year course, students can enrol in standalone subject courses (e.g. 'Indian Polity in 8 Weeks', 'Economy Mastery in 6 Weeks'). These follow the same daily → weekly structure with reviews, but are scoped to a single subject.

Subject Courses Available (UPSC)

- Indian Polity & Governance
 - Indian Economy
 - History (Ancient + Medieval + Modern)
 - Geography (Physical + Human + India)
 - Science & Technology
 - Environment & Ecology
- Ethics, Integrity & Aptitude (GS4)
 - Internal Security & Disaster Mgmt
 - International Relations
 - CSAT (Aptitude)
 - Essay Writing Mastery
 - Optional Subjects (on demand)

Subject Course Structure

Each subject course mirrors the full-year course structure but compressed. The same locking mechanism applies: a student must pass the weekly review (≥7.5/10) to access the next week's content.

Element	Detail
Duration	4–10 weeks depending on subject depth
Daily Schedule	2–4 hours: video lecture + reading + practice questions
Weekly Review	Same 60-minute format: oral (30) + prelims (15) + mains (15)
Reviewer	Subject specialist mentor (can be different from class mentor)
Completion Certificate	Issued upon passing all weeks + final assessment

8

Gamification & Leaderboards

Scoring engine, badges & competitive rankings

Gamification is central to IGen's retention strategy. The one-year UPSC journey is gruelling — competitive elements and visible progress keep aspirants engaged and accountable.

Student Leaderboard

Top 100 students are displayed on the public leaderboard, ranked by cumulative score earned across all weekly reviews, daily habits, and quiz performances. Top 3 students receive featured spotlight cards on the main dashboard and landing page.

Leaderboard Score Computation

Score Component	Weight	Frequency
Weekly Review Score (out of 10)	50%	Weekly
Daily Discipline Streak Bonus	20%	Daily (streak multiplier ×1.5 after 7 days)
Quiz Performance (accuracy %)	15%	Daily
Peer Group Discussion Participation	10%	Per session
Mains Answer Writing Quality	5%	Weekly

Mentor / Advisor Leaderboard

Top 3 Advisors are highlighted based on a composite score that rewards quality and engagement.

- Average student rating (1–5 stars)
 - Number of reviews conducted
 - Student prelims clearance rate under their guidance
 - Review quality score (admin-assessed)
- Active participation in group discussions
 - Response rate to booking requests
 - Consistency of feedback (completeness score)
 - Platform contribution (content, questions added)

Badges & Achievements

Badge	Trigger Condition
■ 7-Day Streak	7 consecutive days of 100% daily habits
■ News Ninja	30 consecutive days of newspaper reading
■ Prelims Ace	Score >90% in 5 consecutive weekly objective sessions
🏆■ Mains Maven	Receive 'Excellent' feedback in 4 consecutive writing sessions
■ Week Champion	Rank #1 on weekly leaderboard
■ Rising Star	Enter top 50 leaderboard for the first time

■ Course Completer	Complete all 52 weeks of the full-year course
■ Discussion Leader	Participate in 20+ group sessions

Admin Panel

Approvals, monitoring & course management

Admin Capabilities Overview

- Approve / reject mentor applications
- Monitor individual student growth & scores
- View domain-wise analytics (UPSC/NEET etc.)
- Create new courses with custom roadmaps
- Assign reviewers to students
- Broadcast system announcements
- Manage platform-wide content (MCQ bank, topics)
- Issue or revoke certificates
- Override week locks (exceptional cases)
- View & export performance reports
- Moderate feedback & ratings
- Configure N8N automation triggers

Admin Dashboard Sections

Module	Key Metrics / Actions
Mentor Management	Pending approvals, approved mentors, suspension, rating overview
Student Analytics	Course-wise enrollment, weekly scores, discipline heatmap, dropout risk
Course Builder	Create month/week/day structure, attach content, set MCQ banks
Leaderboard Control	Configure weights, feature top students on landing page
N8N Workflow Manager	View active automation flows, pause/resume, error logs
Revenue Dashboard	Subscriptions, per-course sales, mentor payouts, refunds
Domain Management	Activate new verticals (NEET, CA), set branding & curriculum

Course Creation Workflow (Admin)

- Admin creates a new course template (name, duration, exam target)
- Defines monthly modules with names and objectives
- Within each month, creates weekly blocks with topic list
- For each week, configures daily tasks (video links, reading material, quiz settings)
- Sets reviewer guidelines and scoring rubric per week
- Assigns default mentor(s) to the course (overridable by student at week-end)
- Publishes course → appears in student portal course catalogue

10

N8N Automation & WhatsApp Nudges

Intelligent motivation engine

N8N is the automation backbone of IGen. It connects to the platform database, reads student activity data, and sends contextual, motivated WhatsApp messages to keep aspirants engaged. N8N runs as a self-hosted service in the platform infrastructure.

Core Automation Workflows

Workflow	Trigger	WhatsApp Message Type
Morning Motivation	Daily 6:00 AM	Inspirational quote + today's task summary
Quiz Reminder	Daily 8:00 PM (if quiz not done)	Friendly nudge: 'Don't break your streak!'
Newspaper Reminder	Daily 9:00 AM (if not marked)	News headlines preview + 'Have you read today?'
Exercise Check-in	Daily 7:00 AM	Motivational push: 'IAS officers are fitness-first!'
Weekly Review Prompt	Every Sunday 10:00 AM	Remind to choose reviewer & schedule review
Score Celebration	After review score posted	Congrats message with score + leaderboard rank
Low Score Alert	If score < 7.5	Supportive message + tips to improve next attempt
Streak Milestone	7, 14, 30, 60 day streaks	Milestone celebration with badge reveal
Inactivity Alert	48 hrs no login	Concerned message: 'We miss you, IAS journey needs you!'
Week Unlock Notification	Next week unlocked	Excited notification + week overview summary
Mentor Session Reminder	1 hour before session	Session reminder with join link
Progress Report	Every Sunday evening	Weekly summary: habits, score, rank change

Sample WhatsApp Messages

■ Morning Motivation (6 AM)

Good morning, future IAS officer! ■■

Today's mission:

- Watch: Federalism (45 min)
- Daily Quiz: 10 questions
- Read The Hindu editorial
- 30 min exercise

Your rank yesterday: #47 | Keep pushing! ■

— IGen UPSC

■■ Inactivity Alert (48 hrs)

Hey [Name], we noticed you've been away for 2 days ■

Your streak was at 12 days — don't let it break now!

The exam doesn't wait. Neither should you. ■

Jump back in: [Link]

— Your IGen Team

■ Score Celebration

Woohoo! You scored 8.5/10 this week! ■■

Your rank: #23 (up from #31 last week!) ■

Reviewer says: 'Excellent conceptual clarity on Federalism'

Next week unlocked → CONSTITUTIONAL BODIES awaits!

— IGen UPSC

Technical Architecture

Full-stack blueprint & infrastructure

Technology Stack

Layer	Technology	Purpose
Frontend	React 18 + TypeScript	SPA — student, mentor & admin portals
State Management	Zustand	Global client state (auth, course progress, UI)
Styling	Tailwind CSS + shadcn/ui	Responsive, accessible design system
Backend API	.NET 8 (C#) — Web API	RESTful + WebSocket endpoints
Architecture Pattern	CQRS + MediatR	Separate read/write models, clean domain logic
Primary Database	SQL Server 2022	All relational data (users, courses, scores)
Caching Layer	Redis (StackExchange.Redis)	Session, leaderboard, rate limiting, pub/sub
Real-Time	SignalR (over WebSocket)	Live typing, live review screens, notifications
Video Infrastructure	WebRTC + Coturn TURN server	In-platform video/audio sessions
Automation	N8N (self-hosted)	WhatsApp workflows, reminders, event automation
Messaging Bus	RabbitMQ (or Azure Service Bus)	Async event processing, email/SMS triggers
File Storage	Azure Blob / AWS S3	Video content, PDFs, profile images, recordings
Search	Elasticsearch (optional Phase 2)	Mentor search, content search, analytics
Auth	ASP.NET Identity + JWT + OAuth2	Student/mentor/admin login, Google SSO
Containerisation	Docker + Docker Compose	Consistent dev/prod environments
CI/CD	GitHub Actions + Azure DevOps	Automated testing, staging, production deploys
CDN	Cloudflare / Azure CDN	Static assets, video delivery, DDoS protection

CQRS Architecture Detail

The backend follows a strict CQRS (Command Query Responsibility Segregation) pattern using MediatR in .NET. Every user action is a Command; every data read is a Query. This ensures clean separation, easy testability, and the ability to scale read replicas independently.

- Commands (writes): CreateStudentCommand, SubmitDailyHabitCommand, BookMentorSessionCommand, SubmitWeeklyReviewCommand, UnlockNextWeekCommand, ApplyAsMentorCommand
 - Command handlers validate, apply business rules, persist, publish domain events
- Queries (reads): GetLeaderboardQuery, GetStudentProgressQuery, GetAvailableMentorsQuery, GetWeeklyScoreQuery, GetDashboardSummaryQuery
 - Query handlers read from optimised read models (Redis-cached where appropriate)

Redis Usage Patterns

Use Case	Redis Pattern	TTL
Leaderboard (top 100)	Sorted Set (ZADD/ZRANGE)	Updated on score change, no TTL
Student Session/Auth Token	String key-value	24 hours
Weekly score cache	Hash per student-week	7 days
Rate limiting (API calls)	Token bucket via RedisRateLimiter	1 minute window
Live review pub/sub	Redis Pub/Sub channels	Session duration only
Mentor availability slots	Hash per mentor-date	48 hours
Daily habit status	Bitmap per student-day	24 hours

12

Core Data Models

Key entities & relationships

User

13

Security & Compliance

Auth, roles, data protection

Authentication & Authorisation

- JWT Bearer tokens with 24-hour expiry + refresh token
- Role-based access control (RBAC): Student, Mentor, Reviewer, Admin, SuperAdmin
- Google SSO for quick registration
- Phone OTP verification for Indian mobile numbers
- All API endpoints protected by [Authorize] attribute
- Course content URLs signed (time-limited) — prevents sharing
- Video recording access restricted to enrolled student + mentor
- Admin panel behind separate subdomain with MFA

Data Protection

- All data encrypted at rest (AES-256 on SQL Server TDE)
- All traffic over HTTPS/TLS 1.3
- PII fields (phone, email) encrypted in DB
- GDPR-compliant data export & deletion on request
- Video recordings purged after 30 days (configurable)
- WhatsApp numbers used only for platform notifications
- No data sold to third parties
- Audit log for all admin actions

Future Roadmap

Phase 2 & 3 vertical expansion

Phase 1 — UPSC (Current Focus)

Full implementation of all UPSC features described in this document. Target: Q3 2025

Phase 2 — NEET, CA, CMA

The platform architecture is vertical-aware from day one. Adding a new exam vertical requires:

- New ExamVertical record in DB
- Custom course curriculum templates
- Subject-specific MCQ banks
- Mentor pool for the new domain
- Vertical-specific landing page card
- Adjusted scoring rubric per exam pattern
- N8N workflows cloned & customised
- Domain admin assignment

Phase 3 — AI Integration

- AI-powered mains answer evaluation (GPT-4 / Claude API)
- Auto-generated daily quiz questions from news
- AI study plan personalisation based on weak areas
- AI mentor chatbot for after-hours queries
- Voice-to-text for oral review transcription
- Sentiment analysis on WhatsApp responses
- Predictive dropout risk modelling
- AI-generated personalised revision schedules

15

Landing Page Design Brief

UI/UX specification

Brand Identity

- Primary: Navy #0A1628 (authority, trust)
 - Accent: Saffron #FF6B00 (energy, India)
 - Gold: #F5A623 (achievement)
 - Teal: #1A7F8E (knowledge, calm)
- Font: Inter (headings) + Nunito (body)
 - Tone: Ambitious, warm, disciplined
 - Imagery: Real aspirants, maps, books, progress charts
 - Motif: Upward graph, unlocking doors, national symbols

Above-the-Fold Hero Section

Full-width hero with navy gradient background. Headline: 'Your 1-Year UPSC Journey, Structured, Gamified & Mentor-Driven.' Sub-headline: 'Join 10,000+ aspirants who track daily habits, compete on leaderboards, and learn from IAS mentors — all in one platform.' CTAs: 'Start Free Trial' (saffron) and 'Meet our Mentors' (outlined). Right side: animated leaderboard preview with top 3 blurred names.

Key Landing Page Sections

Section	Content	Purpose
Hero	Headline, CTA, animated leaderboard preview	Hook & conversion
Domain Cards	6 exam vertical cards (UPSC live, others coming soon)	Domain selection
How It Works	3-step visual: Enrol → Track → Get Reviewed	Demystify the product
Gamification Preview	Leaderboard, badges, streak counter animation	Excitement & FOMO
Mentor Showcase	Carousel of top mentor cards with ratings	Trust & social proof
Student Testimonials	Video + text reviews from cleared aspirants	Credibility
WhatsApp Bot Demo	Phone mockup showing sample motivation messages	N8N feature highlight
Stats Bar	10,000+ students, 200+ mentors, 87% pass rate	Trust signals
Pricing	Full Year course card + Subject course card	Conversion
FAQ	Accordion with 10 common questions	Objection handling
Footer	Links, social, legal, WhatsApp contact	Navigation & trust

■ Design Principle: The landing page must communicate the 'exam marathon companion' feeling — not just a course platform. Every element should remind the visitor that IGen is with them every single day, from 6 AM WhatsApp nudges to Sunday night review sessions.
